# 2002 SUMMARY ANALYSIS

---

The population figures used in this book are estimates based on data received from the Governor's Office of Planning and Budget. In the *Crime in Utah* editions prior to 1993, BCI used population estimates provided by the FBI. As a result, crime rates published in this report will not be identical to the Utah crime rates used in the FBI publications. BCI uses the Planning and Budget Office figures because they are comparable to the FBI estimates and are available earlier in the year, allowing a more timely publication of this report.

- In 2002, a total of 96,782 index crimes were committed which indicates a 0.88% increase in the overall crime rate from 2001.
- The violent crime rate decreased 0.78% from the previous year, with decreases in the homicide rate (33.13%), and the robbery rate (9.74%). The rape rate increased 2.67%, and the aggravated assault rate increased 2.42%.
- Firearms were used in 51.06% of the homicides reported.
- 42.55% of the homicides reported were domestic homicides, 46.81% were not domestic, and in 10.64% the victim/offender relationship was unknown.
- The property crime rate increased 0.98%.
- The burglary rate increased 5.04%.
- The larceny rate decreased 0.33%.
- The value of property stolen amounted to \$87,834,552. Of that amount, \$24,520,653 was recovered, indicating a 27.9% recovery rate.
- Residential burglaries accounted for 58.7% of all burglaries. Of all residential burglaries, 51.9% were known to be committed during daytime hours (6:00 am to 6:00 pm).
- Reported hate crimes decreased from 70 in 2001 to 55 in 2002, a 21.4% decrease.

# CRIME FACTORS

---

In order to produce a meaningful statistical profile of crime within the State of Utah, each law enforcement agency is asked to participate in the Uniform Crime Reporting program (UCR), reporting data on crimes that became known to law enforcement within their jurisdiction. Utah uses the same offense classifications used in the national UCR program so that the resulting crime statistics are comparable to those compiled across the nation.

In the UCR program, crimes are divided into two categories: Part I Crimes (or "Index Crimes"), which include homicide and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny, motor vehicle theft, and arson; and Part II crimes, which include all other non-traffic offenses. If more than one Part I offense is committed in the same criminal episode, only the most serious offense is reported. Only arrest data is collected on the Part II crimes.

Crime rates in this publication are based on the stable population of the municipality. Although transient populations definitely impact the volume and nature of crime, it is impractical to base crime rate calculations on these fluctuating populations. Therefore, a municipality with high transient populations may have a higher crime rate than another municipality of similar size.

Characteristics of the community influence criminal activity and should be considered when attempting to interpret crime statistics presented herein. Thirteen Utah law enforcement agencies did not report crime statistics to the state; these agencies are listed on Page 2.

Below are some factors which will affect the type and volume of crime that occurs and is subsequently reported in a given location.

- Density and size of the population of the community and of the surrounding area.
- Relative stability of the population, including seasonal, commuter, and other transient populations.
- Composition of the population, particularly with reference to age, sex, and socioeconomic status.
- Economic status, including job availability and mores of the population.
- Climate, including seasonal weather conditions.
- Cultural conditions such as educational levels, recreational opportunities, and religious characteristics.
- Effective strength of law enforcement, including cooperation of neighboring agencies, reservations and federal law enforcement agencies.
- Administrative and investigative emphasis and efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Attitudes of the public toward law enforcement and their crime reporting practices.

**This report reflects crime in Utah as far as it is completely and accurately reported by local law enforcement agencies to the Utah Bureau of Criminal Identification.**

# CRIME CLOCK

---

On the average, one **INDEX CRIME** is reported every **5.4 minutes** in the State of Utah.

One **homicide** every  
7.8 days

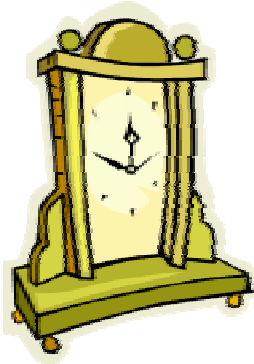

One **rape** every  
9.6 hours

One **robbery** every  
8.0 hours

One **aggravated assault**  
every 2.7 hours

One **burglary** every  
38.0 minutes

One **larceny** every  
7.4 minutes

One **motor vehicle theft**  
every 1.3 hours

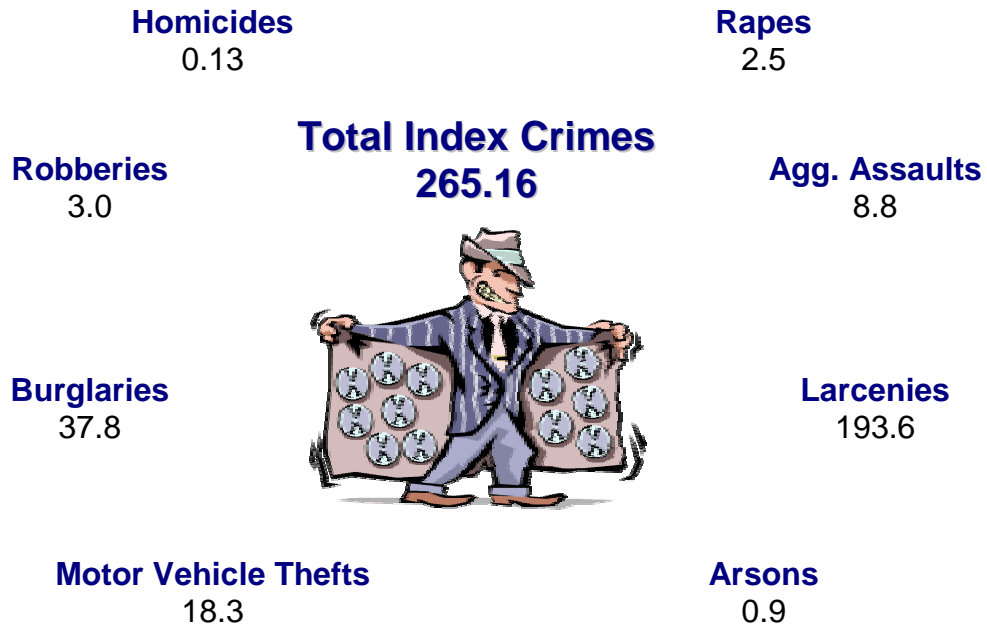

One **arson**  
every 1.13 days

The Crime Clock should be viewed with care. Being an aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency in occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

# CRIME CYCLE

---

Average number of index crimes reported in a 24 hour period in Utah

The Crime Cycle should be viewed with care. Being an aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency in occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

\* BCI receives arson data from the Utah State Fire Marshal's Office

‡ This agency submitted less than 12 months of data. The total number of months submitted is indicated in parentheses.

§ The Washington Terrace PD was dissolved in October of 2002. After that date law enforcement for the city of Washington Terrace was provided by the Weber County Sheriff's Office.

\*\* A reporting problem has made the 2002 data for the Pleasant View PD unreliable. The totals seen here for the Pleasant View PD may not be accurate.

The information seen on pages 12-15 is the actual UCR data that was submitted to BCI by Utah law enforcement agencies. As can be seen, some agencies did not submit a full twelve months of data. Some agencies did not submit any data at all.

Estimated crime totals, where missing amounts are estimated, can be seen on pages 16-19. Keep in mind that the totals seen on pages 16-19 are only estimates, and may not equal the totals that would have been seen, had those agencies submitted twelve months of data.

**NOTE:** The crime totals seen on this page are estimated. Totals for those agencies that did not submit a full 12 months of data were estimated using the formulas seen below. Totals for those agencies that did submit a full 12 months of data were not changed. Keep in mind that the estimated data is only an estimate, and may not represent that agency's actual crime totals.

If an agency submitted 3 or more months of data, but fewer than 12, the estimation is based on the reports that the agency did submit. The total number of crimes for each category (rape, robbery, etc.) is estimated by multiplying the reported number of crimes in that category by 12/N, where N is the number of months for which reports exist. This formula was not used for arson totals, as the arson data is received from the Utah State Fire Marshal. It was not used for homicides, as BCI gathers homicide data from all agencies, regardless of whether or not they submit UCR data.

For agencies that submitted no data at all to BCI, estimated crime rates were based on agencies which are considered to be those in the same population group as the non-submitting agency, and which submitted a full 12 months of data. Thus, if all the fully-submitting agencies in the same population group averaged N number of rapes per 1,000 population, it was estimated that the non-submitting agency in the same population group also had N number of rapes per 1,000 population. The same process was repeated for robbery, aggravated assault, etc. This formula was not used for arson totals, as the arson data is received from the Utah State Fire Marshal. It was not used for homicides, as BCI gathers homicide data from all agencies, regardless of whether or not they submit UCR data.

# INCIDENT BASED REPORTING

# INCIDENT BASED REPORTING

Growing numbers of Utah law enforcement agencies are participating in the Incident Based Reporting program (IBR), taking advantage of computer technology and the more detailed data base captured by an incident based system. As more agencies submit IBR data, it will become a powerful law enforcement tool, providing more detailed, meaningful, and timely information about criminal activities than has been available in the past. In 2002, 72.7% of the Utah population was accounted for by IBR submitting agencies.

Because IBR collects details about the offenses, victims, offenders, property, and arrests involved in each crime incident, it is possible to analyze various aspects of the crime which is occurring in our society, and provide law enforcement administrators, elected officials, and other planners and policy makers with the precise information they need.

The BCI staff recognizes the work and energy that goes into converting to a new reporting system, and we extend our gratitude to the following agencies who have realized the potential of IBR and have committed their resources to its success:

**CLEARANCE** - incidents may be cleared by arrest or by exceptional means.

*Clearance by Arrest:* The FBI's Uniform Crime Reporting Program states that "an offense is cleared by arrest or solved for crime reporting purposes when at least one person is: 1) arrested, 2) charged with the commission of the offense; and 3) turned over to the court for prosecution (whether following arrest, court summons, or police notice). Although no physical arrest is made, a clearance when the offender is a person under 18 years of age and is cited to appear in juvenile court or before other juvenile authorities."

*Clearance by Exception:* The FBI's Uniform Crime Reporting Program states that "In certain situations, law enforcement is not able to follow the three outlined steps under 'clearance by arrest' to clear offenses known to them." However, "if the following questions can be answered 'yes,' the offense is considered to be 'Cleared by Exception.'"

1. Has the investigation definitely established the identity of the offender?
2. Is there enough information to support an arrest, charge, and turning over to the court for prosecution?
3. Is the exact location of the offender known so that the subject could be taken into custody now?
4. Is there some reason outside law enforcement control that precludes arresting, charging, and prosecuting the offender?

Some examples of exceptional clearance situations:

- Death of the offender (suicide, killed by law enforcement, murder-suicide situation, natural causes)
