Introduction

This *2010 Crime in Utah* report is published by the Bureau of Criminal Identification to give governmental leaders and citizens a better understanding of criminal activity in the state. The report is a compilation of crime data reported by local law enforcement agencies throughout the state. The data is reported under the guidelines of the Uniform Crime Reporting (UCR) program, a national program which uses generic crime definitions to ensure that crime data is comparable across political boundaries. BCI forwards data collected from Utah law enforcement agencies to the FBI, who in turn combines it with data from other states to compile and publish an annual report called *Crime in the United States*.

UCR data is collected in two formats: “summary based reporting” which has undergone only minor changes since the 1930's, and “incident based reporting” (IBR) which uses computer technology to collect more detailed information. The summary based system is still used by about half of Utah law enforcement agencies. Therefore, the data from agencies participating in the IBR system is also presented in the summary format to ensure comparable numbers. IBR data is also presented in more detail in a separate section of this report.

In the summary based system, crimes are divided into two categories: *Part I Crimes*, which include criminal homicide (murder, non-negligent manslaughter, and manslaughter by negligence), forcible rape (which is defined by the UCR program as the carnal knowledge of a female forcibly and against her will), robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson; and *Part II Crimes*, which include all other non-traffic crimes. The Part I crimes, except manslaughter by negligence, make up the “*crime index*” used by the FBI to track our nation’s crime situation. Therefore, these crimes are often referred to as index crimes. The number of known offenses and arrests are reported on Part I Crimes, while only arrests are reported on Part II Crimes. If multiple Part I offenses are committed in the same criminal episode, only the most serious offense is reported.

The Part I Crimes are also categorized as *violent crimes* (murder and non-negligent manslaughter, forcible rape, robbery, and aggravated assault) and *property crimes* (burglary, larceny-theft, motor vehicle theft, and arson) for analysis purposes.

The statistics presented in this report are only as accurate as the data provided by the local law enforcement agencies. Seventeen out of one hundred forty-five law enforcement agencies did not submit data for this report.

Acknowledgements

The Department of Public Safety would like to acknowledge and recognize the following law enforcement agencies for their dedication to the UCR/IBR programs. Without their efforts to provide BCI with their crime data, this report would not be possible.

2010 Summary Analysis

The population figures used in this book are based on data received from the U.S. Census Bureau. The U.S. Census Bureau's web site for population totals and the methodology used is located here: http://www2.census.gov/census_2010/04-Summary_File_1/

- In 2010, a total of 92,776 index crimes were committed, which indicates a **4.12% decrease in the overall total of index crimes** from 2009.
- The number of violent crimes **decreased 2.57%** from the previous year; with an increase in the number of homicides (12.2%) and decreases in the numbers of rapes (1.08%), robberies (3.73%), and aggravated assaults (2.69%).
- Property crime **decreased 4.22%**. Larceny decreased 3.5%, motor vehicle theft decreased 14.15%, and arson decreased 15.18%; burglary also decreased 3.14%.
- Firearms were used in 43.48% of the homicides reported.
- 41.18% of the homicides reported involved family relationships, 49.02% did not, and in 9.8% of the homicides the victim/offender relationship was unknown.
- The value of property stolen in 2010 amounted to \$84,612,581. Of that amount, \$18,276,969 was recovered, indicating a 21.6% recovery rate.
- The dollar value of property stolen during 2010 was \$84,612,581, down by 7.4% from last year. Reported recoveries totaled \$18,276,969, a 10.59% decrease from last year.
- Residential burglaries accounted for 68.28% of all burglaries. Of all residential burglaries, 58.20% were known to be committed during daytime hours (6:00 am to 6:00 pm), 36.69% were known to be committed during nighttime hours (6:00 pm to 6:00 am), and the time of day could not be established for 5.11% of reported residential burglaries.
- Reported hate crimes increased from 55 in 2009 to 71 in 2010, a 29.09% increase.
- There were 144,433 arrests reported in 2010. This is up 0.98% from 2009.
- Adult arrests decreased 6.37%. Juvenile arrests decreased 7.89%. (This adult and juvenile arrest data does not include arrests made by the Utah Highway Patrol, as they do not separate arrests into juvenile and adult categories.)

Crime Factors

In order to produce a meaningful statistical profile of crime within the State of Utah, each law enforcement agency is asked to participate in the Uniform Crime Reporting (UCR) program, reporting data on crimes that became known to law enforcement within their jurisdiction. Utah uses the same offense classifications used in the national UCR program so that the resulting crime statistics are comparable to those compiled across the nation.

In the UCR program, crimes are divided into two categories: Part I Crimes (or "Index Crimes"), which include homicide and non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny, motor vehicle theft, and arson; and Part II crimes, which include all other non-traffic offenses. If more than one Part I offense is committed in the same criminal episode, only the most serious offense is reported. Only arrest data is collected on the Part II crimes.

Crime rates in this publication are based on the stable population of the municipality. Although transient populations definitely impact the volume and nature of crime, it is impractical to base crime rate calculations on these fluctuating populations. Therefore, a municipality with high transient populations may have a higher crime rate than another municipality of similar size.

Characteristics of the community influence criminal activity and should be considered when attempting to interpret crime statistics presented herein. Seventeen Utah law enforcement agencies did not report crime statistics to the state.

Below are some factors which will affect the type and volume of crime that occurs and is subsequently reported in a given location.

- Density and size of the population of the community and of the surrounding area.
- Relative stability of the population, including seasonal, commuter, and other transient populations.
- Composition of the population, particularly with reference to age, sex, and socioeconomic status.
- Economic status, including job availability and mores of the population.
- Climate, including seasonal weather conditions.
- Cultural conditions such as educational levels, recreational opportunities, and religious characteristics.
- Effective strength of law enforcement, including cooperation of neighboring agencies, reservations and federal law enforcement agencies.
- Administrative and investigative emphasis and efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Attitudes of the public toward law enforcement and their crime reporting practices.

This report reflects crime in Utah as far as it is completely and accurately reported by local law enforcement agencies to the Utah Bureau of Criminal Identification.

Crime Clock

On the average, one INDEX CRIME is reported every 5.67 minutes in the State of Utah.

One **homicide** every
7.93 days

One **rape** every
9.57 hours

One **robbery** every
6.93 hours

One **aggravated assault**
every 2.47 hours

One **burglary** every
36.72 minutes

One **larceny** every
7.84 minutes

One **motor vehicle theft**
every 1.63 hours

One **arson** every
1.28 days

The Crime Clock should be viewed with care. Being an aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency in occurrence of the Index Offenses. This mode of display should not be taken to imply regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

Officers Assaulted

When reviewing the information on Law Enforcement Officers Killed and Assaulted in this publication the following needs to be considered:

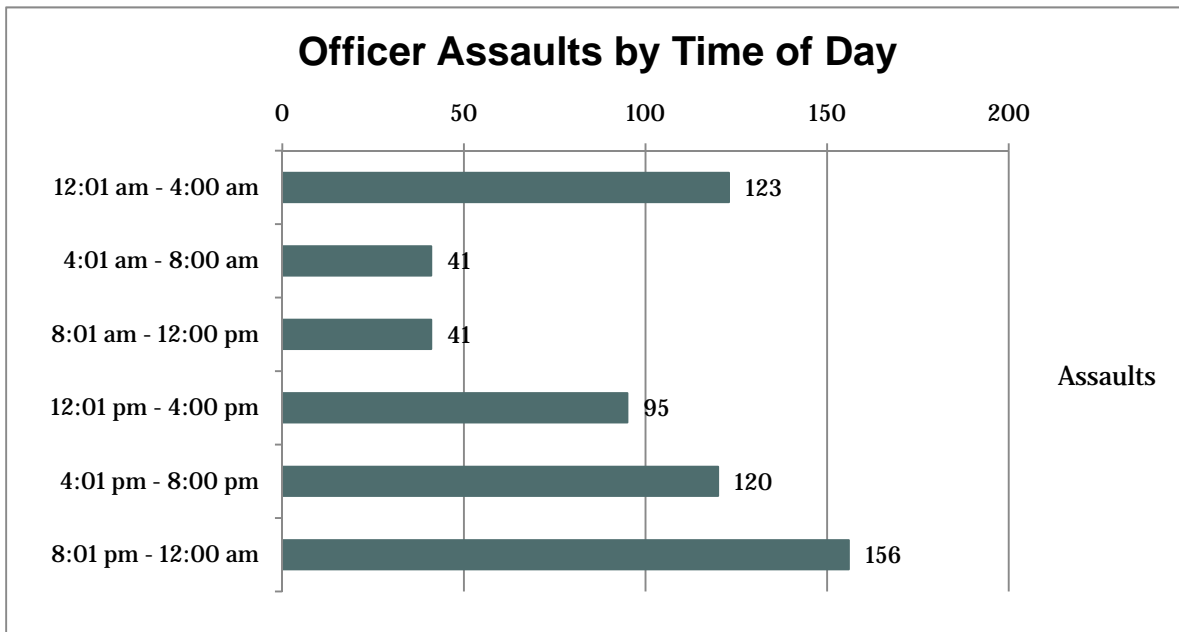

- The data in the tables and charts reflect the number of victim officers, not the number of incidents or weapons used.
- The UCR Program considers any part of the body that can be used as weapons (such as hands, fists, or feet) to be personal weapons and designates them as such in its data.

As of October 31, 2010 there were 4,910 sworn law enforcement officers in Utah. Female officers made up 7.9% with male officers making up 92.1% of the sworn law enforcement officers employed full-time in Utah.

Law Enforcement Employees Per Agency

Because of law enforcement's varying service requirements and functions as well as the diverse demographic traits and characteristics of jurisdictions, use caution when drawing comparisons between agency staffing levels based upon police employment data from the Uniform Crime Reporting (UCR) Program. It must be remembered that the totals given for sworn officers for any particular agency reflect not only the patrol officers on the street but also officers assigned to various other duties such as those in administrative and investigative positions as well as those assigned to special teams.

Data Collection:

- Each year, law enforcement agencies in Utah report the total number of sworn law enforcement officers and civilians in their agency as of October 31 to the UCR Program.
- The UCR Program defines law enforcement officers as full-time, sworn personnel that possess full arrest powers, and carry a weapon. Their primary duties include responding to routine calls for police service, emergency situations, or crime scenes; performing routine patrol; rendering emergency services, enforcing criminal laws and traffic regulations; and investigating violations of criminal laws and traffic accidents. These employees' salaries are paid from law enforcement funds. In addition, correctional officers and police cadets are included in the officer counts only if they are sworn and possess full arrest powers.
- Civilian counts are inclusive of all full-time employees of the agency, i.e., dispatchers, clerks, and meter attendants. These employees' salaries are paid from law enforcement funds. Furthermore, correctional officers or jailers that have no police or arrest powers outside the jail are counted as civilians as long as their salaries are paid from the funds of the law enforcement agency.

Overview:

- In 2010, sworn officers accounted for 69.8% of all law enforcement personnel in Utah.
- The rate of full-time law enforcement employees (civilian and sworn) per 1,000 inhabitants in Utah for 2010 was 2.54; the rate of sworn officers was 1.78 per 1,000. The UCR Program computes these rates by taking the number of employees, dividing by the population of agency's jurisdiction, and multiplying by 1,000.
- Female employees accounted for 58.8% of all full-time civilian law enforcement employees in 2010.
- Males accounted for 92.1% of all full-time sworn law enforcement officers in 2010.

*This agency submitted six months of data.

Estimated Agency Crime Totals

As not all agencies submit a full 12 months of data, it is necessary to estimate data for those agencies. If an agency submitted 3 or more months of data, but fewer than 12, the estimation is based on the reports that the agency did submit. The total number of crimes for each category (rape, robbery, etc.) is estimated by multiplying the reported number of crimes in that category by 12/N, where N is the number of months for which reports exist. This formula was not used for homicides, as BCI gathers homicide data from all agencies, regardless of whether or not they submit UCR data. This formula is also not used for arsons.

For agencies that submitted no data at all to BCI, estimated crime rates were based on agencies which are considered to be those in the same population group as the non-submitting agency, and which submitted a full 12 months of data. Thus, if all the fully-submitting agencies in the same population group average N number of rapes per 1,000 population it was estimated that the non-submitting agency in the same population group also had N number of rapes per 1,000 population. The same process was repeated for robbery, aggravated assault, etc. It was not used for homicides, as BCI gathers homicide data from all agencies, regardless of whether or not they submit UCR data. Estimation was also not calculated on the arson data.

The Utah Highway Patrol arrest statistics cannot be broken down by age; therefore, UHP arrest statistics are reported as one number.

The increase in the Highway Patrol's DUI and liquor law arrests from 2009 to 2010 is due to a 2010 enforcement emphasis goal placed on impaired drivers by the Utah Highway Patrol. The increase in drug sale and manufacture arrests is due to the success of the Utah Highway Patrol Criminal Interdiction Team. 2010 was the most successful year to date.

In 2010 the FBI ceased gathering arrest data on runaway juveniles.

Incident Based Reporting

Introduction – What is Incident Based Reporting?

The National Incident Based Reporting System (NIBRS) is an updated method of collecting crime data within the UCR program. It was designed to provide more comprehensive data for the management of crime in our society. In an incident based reporting (IBR) system, computer technology is used to collect more detailed information about the crimes that occur. The availability of detailed information about criminal activity, stored in a computer data base, makes the analysis of criminal activity a viable tool for law enforcement administrators and other public officials.

The Utah Incident Based Reporting System was implemented in 1991; 69 agencies submitted IBR data for this report. The data accepted by the Utah repository is also forwarded to the NIBRS repository where the FBI uses it to depict criminal activity nationwide.

The data from the IBR system is not directly comparable to the data from the summary based reports. Information about each incident and arrest is collected for 22 offense categories comprised of 46 Group A offenses. All offenses that occur in a criminal episode are reported, not just the most serious. Only arrest data is collected for 11 Group B crimes.

Converting to IBR takes a lot of planning, work, and patience. It also requires enough foresight to see the value of accurate, detailed crime data in understanding and managing this serious problem. The agencies that submit NIBRS data to BCI are listed on the following page. BCI appreciates these agencies which have made the commitment to participate in the NIBRS program:
