2021 Crime in Utah Report Introduction

This *2021 Crime in Utah* report is published by the Utah Department of Public Safety's Bureau of Criminal Identification (BCI) to give governmental leaders and citizens a better understanding of criminal activity in the state. The report is a compilation of crime data reported by local law enforcement agencies throughout the state. The data is reported under the guidelines of the Uniform Crime Reporting (UCR) program, a national program which uses generic crime definitions to ensure that crime data is comparable across political boundaries. BCI forwards data collected from Utah law enforcement agencies to the FBI, who in turn combines it with data from other states to compile and publish an annual report called *Crime in the United States*. National data may also be located on the FBI's Crime Data Explorer.

Starting January 1, 2021, UCR data became solely collected in the "National Incident Based Reporting" (NIBRS) format which uses computerized data systems to collect more detailed information. Prior to January 1, 2021, Utah was what was known as a hybrid state, where local law enforcement agencies submitted their UCR data as either NIBRS or the retired Summary format. For more information on Summary reporting, please refer to previous years' Crime in Utah reports located on the bci.utah.gov website.

In 2022, the Utah Bureau of Criminal Identification released a modernized view of the Uniform Crime Reporting data provided by local law enforcement agencies through the NIBRS system to the state repository. This dashboard, called the Crime in Utah Dashboards, will replace the Crime in Utah PDF report as an avenue for trend data provided through the NIBRS data. 2021 will become a base starting point as the first year in which all law enforcement agencies in Utah were required to submit NIBRS data. With this change, trends will no longer be found in this report.

128 agencies in Utah submitted NIBRS data in 2021, accounting for 88.27% of the agencies and covering 96.48% of Utah's population. Some law enforcement agencies in Utah do not submit their crime statistics to BCI, but forward them directly to the FBI. Such entities include military installations, national parks, and tribal lands. To view the crime statistics for such agencies, please refer to the FBI's *Crime in the United States* publication.

The statistics presented in this report are only as accurate as the data provided by the local law enforcement agencies.

Acknowledgements

The Department of Public Safety would like to acknowledge and recognize the following law enforcement agencies for their dedication to the UCR NIBRS program. Without their efforts to provide BCI with their crime data, this report would not be possible.

Crime Factors

In order to produce a meaningful statistical profile of crime within the State of Utah, each law enforcement agency is asked to participate in the UCR program, reporting data on crimes that became known to law enforcement within their jurisdiction. Utah uses the same offense classifications used in the national UCR program so that the resulting crime statistics are comparable to those compiled across the nation.

Crime rates in this publication are based on the stable population of the municipality. Although transient populations definitely impact the volume and nature of crime, it is impractical to base crime rate calculations on these fluctuating populations. Therefore, a municipality with high transient populations may have a higher crime rate than another municipality of similar size. *Characteristics of the community influence criminal activity and should be considered when attempting to interpret crime statistics presented herein.* Below are some factors which will affect the type and volume of crime that occurs and is subsequently reported in a given location.

- Density and size of the population of the community and of the surrounding area.
- Relative stability of the population, including seasonal, commuter, and other transient populations.
- Composition of the population, particularly with reference to age, sex, and socioeconomic status.
- Economic status, including job availability and mores of the population.
- Climate, including seasonal weather conditions.
- Cultural conditions such as educational levels, recreational opportunities, and religious characteristics.
- Effective strength of law enforcement, including cooperation of neighboring agencies, reservations and federal law enforcement agencies.
- Administrative and investigative emphasis and efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Attitudes of the public toward law enforcement and their crime reporting practices.

This report reflects crime in Utah as far as it is completely and accurately reported by local law enforcement agencies to the Utah Bureau of Criminal Identification

2021 Summary Analysis

The population figures used in this report are based on data received from the U.S. Census Bureau. The U.S. Census Bureau's website for population totals and the methodology used is located here: U.S. Census Bureau QuickFacts: Utah

With the transition to a fully NIBRS reporting state that occurred beginning January 2021, 2021 will become a new base year for crime statistics and comparison. Due to this change, 2021 will not have a traditional Summary Analysis.

The Utah Bureau of Criminal Identification with the Department of Public Safety launched a new Crime in Utah Dashboard where the Uniform Crime Reporting data (NIBRS) will now be publicly available. It will be on these Dashboards that the most up to date and current trends may be found. Please keep in mind when looking at the dashboard that agencies were not required to submit NIBRS data until January 1, 2021 so any previous years showing may not have the same number of agencies participating. You may always refer to the PDF Crime in Utah reports for a list of participating agencies for any given year.

National Incident Based Reporting (NIBRS)

The concept of National Incident Based Reporting System, also referred to as IBR or NIBRS, was developed by the FBI in the 1980s to provide more comprehensive data for the management of crime in our society. In a NIBRS system, computerized data systems are utilized to collect more detailed information about the crimes that occur. The availability of detailed information stored in a law enforcement agency's records management system database makes for a more comprehensive analysis of criminal activity. The Utah Incident Based Reporting System was implemented in 1991. In January 2021, all agencies were required to submit using the NIBRS format. 128 Utah agencies submitted NIBRS data for this report. The data accepted by the Utah repository is also forwarded to the FBI's NIBRS repository where it is used to depict criminal activity nationwide.

The data from the NIBRS system is not directly comparable to the data from the Summary reports which were retired at the end of 2020 and can be found in prior years' Crime in Utah reports located on the bci.utah.gov website. Information about each incident and arrest is collected for 24 offense categories comprised of 52 Group A offenses. All offenses that occur in a criminal episode are reported, not just the most serious offense (as opposed to the "hierarchy rule" that existed with Summary reporting).

NIBRS data belongs in one of three categories: Crimes Against Persons, Crimes Against Property, and Crimes Against Society.

Crimes Against Persons

Crimes Against Persons are those offenses collected in NIBRS whose victims are always individuals. One offense per victim is counted in a Crime Against Person.

Criminal incidents reported by the Utah Division of Wildlife Resources, Utah Highway Patrol, Utah State Parks and Recreation, Utah Motor Vehicle Enforcement Division, and the Utah Transit Authority PD may have occurred anywhere in the state where the agencies have jurisdiction.

Crimes Against Property

Crimes Against Property are offenses in which the object of the crime is to obtain something such as money, property, or some other benefit. Examples include Robbery, Bribery, and Burglary. One offense is counted for each distinct operation of a Crime Against Property except for Motor Vehicle Theft, where one offense is counted for each stolen vehicle.

Criminal incidents reported by the Utah Division of Wildlife Resources, Utah Highway Patrol, Utah State Parks and Recreation, Utah Motor Vehicle Enforcement Division, and the Utah Transit Authority PD may have occurred anywhere in the state where the agencies have jurisdiction.

Crimes Against Society

Crimes Against Society are offenses that are classified as those that represent society's prohibition against engaging in certain types of activity. These are not crimes against persons because they do not actually involve an injured party; nor are they against property because property is not the object of the crime. This category includes things such as drug/narcotic offenses, gambling offenses, pornography/obscene material, and prostitution offenses.

Criminal incidents reported by the Utah Division of Wildlife Resources, Utah Highway Patrol, Utah State Parks and Recreation, Utah Motor Vehicle Enforcement Division, and the Utah Transit Authority PD may have occurred anywhere in the state where the agencies have jurisdiction.

NIBRS Crimes Against Totals

The following table shows each NIBRS Crime Categories' totals along with the population of an agency's jurisdiction. The Crime Rate Per 1,000 shown in this table cannot be compared to that found in previous Crime in Utah reports where this information was calculated using both the population and the Summary form of reporting known as Index Crimes. The Index Crimes table only contained data for eight offenses whereas this table includes all offenses collected in each category of NIBRS. Refer to the Introduction section of this report for further information.

Criminal incidents reported by the Utah Division of Wildlife Resources, Utah Highway Patrol, Utah State Parks and Recreation, Utah Motor Vehicle Enforcement Division, and the Utah Transit Authority PD may have occurred anywhere in the state where the agencies have jurisdiction. If the population field is blank that is because there is no designated population for those specific jurisdictions.

Law Enforcement Officers Killed and Assaulted

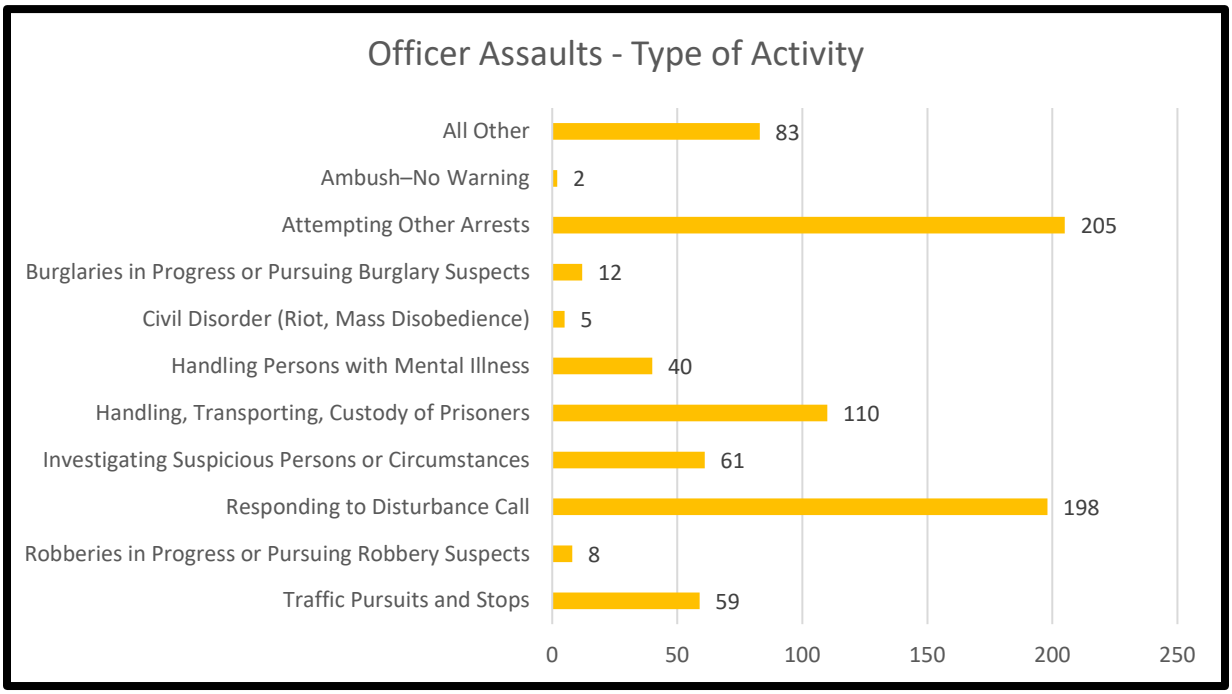

When reviewing the information on Law Enforcement Officers Killed and Assaulted (LEOKA) the following needs to be considered:

- The data in the tables and charts reflect the number of victim officers, not the number of incidents or weapons used.
- The UCR program considers any part of the body that can be used as weapons (such as hands, fists, or feet) to be personal weapons and designates them as such in its data.
- Not all agencies submit data on the number of officers assaulted in their jurisdiction.

More information pertaining to this data may be found on the Crime in Utah Dashboard.

Law Enforcement Employees per Agency

Because of law enforcement's varying service requirements and functions as well as the diverse demographic traits and characteristics of jurisdictions, use caution when drawing comparisons between agency staffing levels based upon police employment data from the UCR program. It must be remembered that the totals given for sworn officers for any particular agency reflect not only the patrol officers on the street but also officers assigned to various other duties such as those in administrative and investigative positions as well as those assigned to special teams.

Data Collection:

- Each year, law enforcement agencies in Utah report the total number of sworn law enforcement officers and civilians in their agency as of October 31st to the UCR program.
- The UCR program defines law enforcement officers as full-time, sworn personnel that possess full arrest powers, and carry a weapon. Their primary duties include responding to routine calls for police service, emergency situations, or crime scenes; performing routine patrol; rendering emergency services, enforcing criminal laws and traffic regulations; and investigating violations of criminal laws and traffic accidents. These employees' salaries are paid from law enforcement funds. In addition, correctional officers and police cadets are included in the officer counts *only* if they are sworn and possess full arrest powers.
- Civilian counts are inclusive of all full-time employees of the agency, e.g., dispatchers, clerks, and meter attendants. These employees' salaries are paid from law enforcement funds. Furthermore, correctional officers or jailers that have no police or arrest powers outside the jail are counted as civilians as long as their salaries are paid from the funds of the law enforcement agency.

Overview:

- In 2021, sworn officers accounted for 71.32% of all law enforcement personnel in Utah.
- The number of full-time law enforcement employees (civilian and sworn) per 1,000 inhabitants in Utah for 2021 was 2.29; the rate of sworn officers was 1.63 per 1,000. The UCR program computes these rates by taking the number of employees, dividing by the population of an agency's jurisdiction, and multiplying by 1,000. These numbers do not include the agencies that did not submit employee data in 2021.
- Female employees accounted for 56.63% of all full-time civilian law enforcement employees in 2021.
- Males accounted for 91.25% of all full-time sworn law enforcement officers in2021.

As of October 31, 2021, there were 5,441 sworn law enforcement officers in Utah. Female officers made up 8.75% (476 officers) with male officers making up 91.25% (4965) of the sworn law enforcement officers employed full-time in Utah. *These numbers do not include the agencies that did not submit employee data in* 2021.

Agencies that submit Summary based data record all arrests that cannot be categorized under any other Part II category in "All Other Offenses".

American Indian or Alaska Native- Race: A person having origins in any of the original peoples of North and South America (including Central America) and who maintains cultural identification through tribal affiliation or community recognition. Burglary/Breaking and Entering: The unlawful entry into a building or other structure with the intent to commit a felony or a theft.

Clearance: Incidents may be cleared by arrest or by exceptional means:

Clearance by arrest: An offense is cleared by arrest or solved for crime reporting purposes when at least one person is 1) arrested, 2) charged with the commission of the offense; and then turned over to the court for prosecution (whether following arrest, court summons, or police notice). Although no physical arrest is made, a clearance may occur when the offender is a person under 18 years of age and is cited to appear in juvenile court or before other juvenile authorities.

Clearance by Exception: The FBI's Uniform Crime Reporting Program states that "in certain situations, law enforcement is not able to follow the three outlined steps under 'clearance by arrest' to clear offenses known to them". However, "if the following questions can be answered 'yes', the offense is considered to be 'Cleared by Exception':

1. Has the investigation definitely established the identity of the offender?
2. Is there enough information to support an arrest, charge, and turning over to the court for prosecution?
3. Is the exact location of the offender known so that the subject could be taken into custody now?
4. Is there some reason outside law enforcement control that precludes arresting, charging, and prosecuting the offender?

Some examples of exceptional clearance situations (these examples are not all inclusive):

- Death of the offender (suicide, killed by law enforcement, murder-suicide situation, natural causes)
- Deathbed confession by offender
- Offender already in custody or serving sentence for another offense

Crime Rate Per 1,000: Number of crimes committed for every 1,000 residents. Breaking down the number of crimes by size of population is one way to gauge how an agency's crime rates compare with those of other agencies. Crime Rate per 1,000 is calculated by dividing the agency's number of crimes by the agency's population and multiplying the result by 1,000. ((Crimes/Population) *1,000)
