2005 Summary Analysis

The population figures used in this book are estimates based on data received from the U.S. Census Bureau. In the *Crime in Utah* editions prior to 1993, BCI used population estimates provided by the FBI. As a result, crime rates published in this report will not be identical to the Utah crime rates used in the FBI publications. The U. S. Census Bureau's web site that gives the population figures and the methodology used is located here: <http://www.census.gov> .

- In 2005, a total of 99,650 index crimes were committed, which indicates a 0.55% increase in the overall crime rate from 2004.
- The violent crime rate increased 1.97% from the previous year, with increases in the homicide rate (30.95%), the aggravated assault rate (5.78%) and the rape rate (2.76%). The robbery rate decreased 9.90%.
- Firearms were used in 49% of the homicides reported.
- 34.55% of the homicides reported were domestic homicides, 58.18% were not domestic, and in 7.27% the victim/offender relationship was unknown.
- The property crime rate increased 0.47%.
- The burglary rate increased 2.54%.
- The larceny rate decreased 1.16%.
- The value of property stolen amounted to \$97,316,082. Of that amount, \$32,252,164 was recovered, indicating a 33.14% recovery rate.
- Residential burglaries accounted for 61.80% of all burglaries. Of all residential burglaries, 55.4% were known to be committed during daytime hours (6:00 am to 6:00 pm).
- Reported hate crimes decreased from 56 in 2004 to 39 in 2005, a 30.36% decrease.

Crime Factors

In order to produce a meaningful statistical profile of crime within the State of Utah, each law enforcement agency is asked to participate in the Uniform Crime Reporting (UCR) program, reporting data on crimes that became known to law enforcement within their jurisdiction. Utah uses the same offense classifications used in the national UCR program so that the resulting crime statistics are comparable to those compiled across the nation.

In the UCR program, crimes are divided into two categories: Part I Crimes (or “Index Crimes”), which include homicide and non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny, motor vehicle theft, and arson; and Part II crimes, which include all other non-traffic offenses. If more than one Part I offense is committed in the same criminal episode, only the most serious offense is reported. Only arrest data is collected on the Part II crimes.

Crime rates in this publication are based on the stable population of the municipality. Although transient populations definitely impact the volume and nature of crime, it is impractical to base crime rate calculations on these fluctuating populations. Therefore, a municipality with high transient populations may have a higher crime rate than another municipality of similar size.

Characteristics of the community influence criminal activity and should be considered when attempting to interpret crime statistics presented herein. Nineteen Utah law enforcement agencies did not report crime statistics to the state.

Below are some factors which will affect the type and volume of crime that occurs and is subsequently reported in a given location.

- Density and size of the population of the community and of the surrounding area.
- Relative stability of the population, including seasonal, commuter, and other transient populations.
- Composition of the population, particularly with reference to age, sex, and socioeconomic status.
- Economic status, including job availability and mores of the population.
- Climate, including seasonal weather conditions.
- Cultural conditions such as educational levels, recreational opportunities, and religious characteristics.
- Effective strength of law enforcement, including cooperation of neighboring agencies, reservations and federal law enforcement agencies.
- Administrative and investigative emphasis and efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Attitudes of the public toward law enforcement and their crime reporting practices.

This report reflects crime in Utah as far as it is completely and accurately reported by local law enforcement agencies to the Utah Bureau of Criminal Identification.

Crime Clock

On the average, one **INDEX CRIME** is reported every **5.27 minutes** in the State of Utah.

One **homicide** every
6.64 days

One **rape** every
9.42 hours

One **robbery** every
7.96 hours

One **aggravated assault**
every 2.5 hours

One **burglary** every
37 minutes

One **larceny** every
7.3 minutes

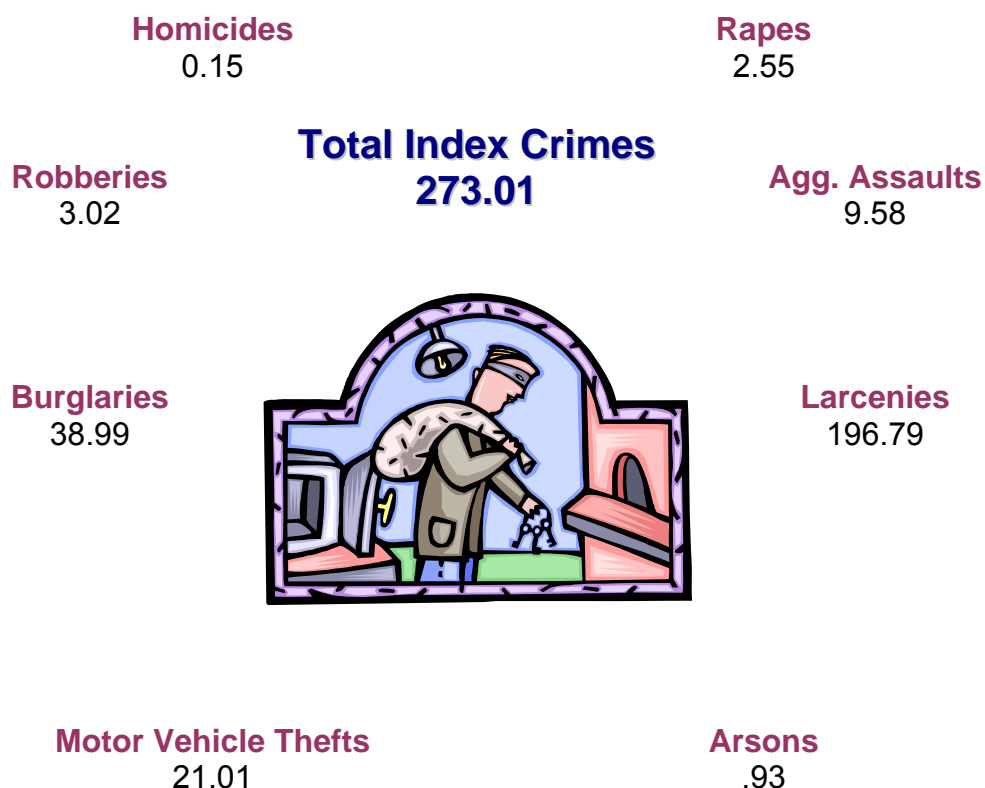

One **motor vehicle theft**
every 1.1 hours

One **arson**
every 1.08 days

The Crime Clock should be viewed with care. Being an aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency in occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

Crime Cycle

Average number of index crimes reported in a 24 hour period in Utah

The Crime Cycle should be viewed with care. Being an aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency in occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

Local Agency Overview

Data for the Local Agency Overview is compiled from information that the local agencies submit to BCI. Refer to the Glossary section for definitions of the offenses listed below. Offenses are defined according to the FBI Uniform Crime Reporting definitions, which may vary from the state crime statutes.

Please note that **Arson data** was previously taken from the Utah State Fire Marshal's data. It is now compiled from the data submitted to BCI from the local law enforcement agencies. This gives us data that more accurately reflects the FBI Uniform Crime Reporting guidelines.

NOTES:

§Cache Rich Drug Task Force covers both counties.

* This agency did not submit 12 months of full data.

‡ Taylorsville PD was commissioned on April 1, 2005. Prior to that date, Taylorsville was counted with the Salt Lake County Sheriff' Office crime counts.

≈West Jordan PD had computer problems in May 2005, so not all data for that month was submitted.

≠Naples PD changed computer systems and since September 2005 have been submitting summary data.

≈ Utah Highway Patrol only collects data on arrests - see the arrest data.

NOTE on Arson: Arson data was previously taken from the Utah State Fire Marshal's data, it is now compiled from the data submitted to BCI from the local law enforcement agencies. This gives us data that more accurately reflects the FBI Uniform Crime Reporting guidelines.

Estimated Agency Crime Totals

If an agency submitted 3 or more months of data, but fewer than 12, the estimation is based on the reports that the agency did submit. The total number of crimes for each category (rape, robbery, etc.) is estimated by multiplying the reported number of crimes in that category by 12/N, where N is the number of months for which reports exist. This formula was not used for homicides, as BCI gathers homicide data from all agencies, regardless of whether or not they submit UCR data.

For agencies that submitted no data at all to BCI, estimated crime rates were based on agencies which are considered to be those in the same population group as the non-submitting agency, and which submitted a full 12 months of data. Thus, if all the fully-submitting agencies in the same population group averaged N number of rapes per 1,000 population, it was estimated that the non-submitting agency in the same population group also had N number of rapes per 1,000 population. The same process was repeated for robbery, aggravated assault, etc. It was not used for homicides, as BCI gathers homicide data from all agencies, regardless of whether or not they submit UCR data. Estimation was also not calculated on the arson data.

Incident Based Reporting

Growing numbers of Utah law enforcement agencies are participating in the Incident Based Reporting program (IBR), taking advantage of computer technology and the more detailed data base captured by an incident based system. As more agencies submit IBR data, it will become a powerful law enforcement tool, providing more detailed, meaningful, and timely information about criminal activities than has been available in the past. In 2005, 75% of the Utah population was accounted for by IBR submitting agencies.

Because IBR collects details about the offenses, victims, offenders, property, and arrests involved in each crime incident, it is possible to analyze various aspects of the crime which is occurring in our society, and provide law enforcement administrators, elected officials, and other planners and policy makers with the precise information they need.

The BCI staff recognizes the work and energy that goes into converting to a new reporting system, and we extend our gratitude to the following agencies that have realized the potential of IBR and have committed their resources to its success:

Although no physical arrest is made, a clearance when the offender is a person under 18 years of age and is cited to appear in juvenile court or before other juvenile authorities."

Clearance by Exception: The FBI's Uniform Crime Reporting Program states that "In certain situations, law enforcement is not able to follow the three outlined steps under 'clearance by arrest' to clear offenses known to them." However, "if the following questions can be answered 'yes,' the offense is considered to be 'Cleared by Exception.'"

1. Has the investigation definitely established the identity of the offender?
2. Is there enough information to support an arrest, charge, and turning over to the court for prosecution?
3. Is the exact location of the offender known so that the subject could be taken into custody now?
4. Is there some reason outside law enforcement control that precludes arresting, charging, and prosecuting the offender?

Some examples of exceptional clearance situations:

- Death of the offender (suicide, killed by law enforcement, murder-suicide situation, natural causes)
- Deathbed confession by offender
- Offender already in custody or serving sentence for another offense
- Extradition denied
- Victim refuses to cooperate in prosecution
